OUR VISION, YOUR SAFETY

Corporate overview

ABOUT US

MK Infrastructure (P) Ltd has been leading the industry in fabrication, supply of road safety furniture, construction of road infrastructure and building and construction works. With its successful partnerships on several high-risk projects with the Central and State government, The Indian Army and private companies, the company, over the past 30 years brings along great experience in serving with the same commitment it has for the past three decades.

Working towards fulfilling the nation's infrastructure goal, we at M.K Infrastructure have been committed to realizing these objectives.

Our mission

M.K Infrastructure (P) Ltd has been committed to providing valued quality products at competitive prices with the highest standards of after service for over thirty years. We use the most advance and innovative technology to deliver quality solutions to our clients without limiting ourselves to any regional limits or boundaries.

Our vision

Our company aims to emerge as an industry benchmark across each of its verticals through a combination of ethical standard, operating efficiency, product quality and superior service. We are committed to be a preferred partner for all our stakeholders through a consistent ability to enhance their respective value.

BRIEF HISTORY

Our parent company O.P. Kandoi & Co. came into being in 1972 and soon rose to become Class 1 contractor with Central Public Work Department (CPWD). Keeping with the times and growing expectations from our company we decided to expand and diversify our activities. This is how M.K. Infrastructure (P) Ltd. was born in the year 2003 with its registered office in Siliguri, West Bengal. Our main focus is on providing and maintaining road safety systems of international standard.

Till this time the modern road safety system existed mostly in metropolitan cities of our country and it was a new concept, especially in the North Eastern States, Sikkim and neighbouring countries such as Bhutan and Nepal.

With growing demands, the company expanded its operations to different states and union territories - Assam, Arunachal Pradesh, Meghalaya, Sikkim, New Delhi and Port Blair. Eventually, we also expanded our operations internationally with projects in Bhutan and Nepal.

Our present range of business includes:

- Designing, execution and construction of Buildings, State & National Highways and Bridges etc.
- Full range of latest Road Safety Systems which include Reflective Signage & Sheeting, Road Marking with Hot Thermoplastic Paint, Metal Crash Barriers/Guard Rails, Reflective Pavement Marker, Delineators, Acrylic Reflectors, LDS, Photo-Luminescent Signs, Modular Speed Breakers/Rumbler, Median Marker and Solar Powered Road Safety Equipment etc.
- Construction & supply of toilet blocks and bathing cubicles, etc.
- We undertake 'turn-key' projects also
- Subsequently, keeping in view diversification of activities, M K Infrastructure (P) Ltd entered into a contract with the Ministry of Defence During the year 2007 for providing and erecting Prefabricated shelters for troops in forward areas of Sikkim where sub-zero condition prevails throughout the year
- We also deal in execution and supply of rockfall protection system, flexible slope stabilisation system & flexible rockfall barrier that helps in preventing landslides, rockfalls, debris flow and avalanches

With the growing needs of a sustainable and a self-reliant future, the Indian government has taken up new initiatives and have developed several infrastructure policies. This has led our company to come up with innovative & sustainable solutions in the field of hybrid solar power, flexible rockfall barrier & slope stabilisation systems and light weight toilet/bio-toilets & bathing cubicles.

OUR APPROACH

1 **Understanding client's need**
 Inception of any work demands knowing the needs of the client in order to develop a strategy.

2 **Surveying the location**
 After having understood the needs, surveying through the site is the next call for action

3 **Designing the framework**
 After a thorough investigation of the site, a road map is drawn for the execution of the project

4 **Supply and Execution**
 Based on the blueprint, the project is executed and the materials are supplied within the time period

Our Products

OVERHEAD SIGN BOARDS / GANTRY

A. Mandatory/Regulatory Signs: These signs are mandatory on roads for it makes driving safer. They have generally black legend on a white background. They are circular in shape with red borders.

B. Caution/Warning Signs

C. Informatory/Guide Signs: These signs provide information to the driver about the facilities available ahead, the route and distance to reach the specific destinations.

D. Overhead Gantry Board / Cantilever

E. Project Sign Boards: These boards are installed to any Road Project on behalf of the contractor on sites. The main intent of these boards is to ensure that consistent information is being communicated and it also provides visual consistency.

	<p>As per Requirements</p>
---	----------------------------

F. Hazard Marker and Chevron Sign Board: These boards are designed in compliance with IRC -67-2001 and MORTH specification. These are designed with a durable finish. Made of Retro Reflective sheeting and ACP base, these are long lasting in nature and not affected by adverse climatic condition.

	<p>As per Requirement</p>
