OUR VISION, YOUR SAFETY

Corporate overview

ABOUT US

MK Infrastructure (P) Ltd has been leading the industry in fabrication, supply of road safety furniture, construction of road infrastructure and building and construction works. With its successful partnerships on several high-risk projects with the Central and State government, The Indian Army and private companies, the company, over the past 30 years brings along great experience in serving with the same commitment it has for the past three decades.

Working towards fulfilling the nation's infrastructure goal, we at M.K Infrastructure have been committed to realizing these objectives.

Our mission

M.K Infrastructure (P) Ltd has been committed to providing valued quality products at competitive prices with the highest standards of after service for over thirty years. We use the most advance and innovative technology to deliver quality solutions to our clients without limiting ourselves to any regional limits or boundaries.

Our vision

Our company aims to emerge as an industry benchmark across each of its verticals through a combination of ethical standard, operating efficiency, product quality and superior service. We are committed to be a preferred partner for all our stakeholders through a consistent ability to enhance their respective value.

BRIEF HISTORY

Our parent company O.P. Kandoi & Co. came into being in 1972 and soon rose to become Class 1 contractor with Central Public Work Department (CPWD). Keeping with the times and growing expectations from our company we decided to expand and diversify our activities. This is how M.K. Infrastructure (P) Ltd. was born in the year 2003 with its registered office in Siliguri, West Bengal. Our main focus is on providing and maintaining road safety systems of international standard.

Till this time the modern road safety system existed mostly in metropolitan cities of our country and it was a new concept, especially in the North Eastern States, Sikkim and neighbouring countries such as Bhutan and Nepal.

With growing demands, the company expanded its operations to different states and union territories - Assam, Arunachal Pradesh, Meghalaya, Sikkim, New Delhi and Port Blair. Eventually, we also expanded our operations internationally with projects in Bhutan and Nepal.

Our present range of business includes:

- Designing, execution and construction of Buildings, State & National Highways and Bridges etc.
- Full range of latest Road Safety Systems which include Reflective Signage & Sheeting, Road Marking with Hot Thermoplastic Paint, Metal Crash Barriers/Guard Rails, Reflective Pavement Marker, Delineators, Acrylic Reflectors, LDS, Photo-Luminescent Signs, Modular Speed Breakers/Rumbler, Median Marker and Solar Powered Road Safety Equipment etc.
- Construction & supply of toilet blocks and bathing cubicles, etc.
- We undertake 'turn-key' projects also
- Subsequently, keeping in view diversification of activities, M K Infrastructure (P) Ltd entered into a contract with the Ministry of Defence During the year 2007 for providing and erecting Prefabricated shelters for troops in forward areas of Sikkim where sub-zero condition prevails throughout the year
- We also deal in execution and supply of rockfall protection system, flexible slope stabilisation system & flexible rockfall barrier that helps in preventing landslides, rockfalls, debris flow and avalanches

With the growing needs of a sustainable and a self-reliant future, the Indian government has taken up new initiatives and have developed several infrastructure policies. This has led our company to come up with innovative & sustainable solutions in the field of hybrid solar power, flexible rockfall barrier & slope stabilisation systems and light weight toilet/bio-toilets & bathing cubicles.

OUR APPROACH

1 **Understanding client's need**
 Inception of any work demands knowing the needs of the client in order to develop a strategy.

2 **Surveying the location**
 After having understood the needs, surveying through the site is the next call for action

3 **Designing the framework**
 After a thorough investigation of the site, a road map is drawn for the execution of the project

4 **Supply and Execution**
 Based on the blueprint, the project is executed and the materials are supplied within the time period

Our Products

RETRO-REFLECTIVE SHEETING

- A. Commercial Grade Reflective Sheeting: Retro-Reflective Sheeting is fabricated using synthetic resin that sturdily resists the damaging effect of changing weather and even impacts high reflectivity, particularly at night. The sheets have mainly been designed for using on vehicle license plates and traffic signs contributing greatly to public safety.

Enclosed lens reflective sheeting

Reflectivity: Exceeds specification ASTM D 4956-04 Type 1.

Best For: Such materials are utilized for short time advertisements/signs, sticker, number plates within areas having low volume, little competing surrounding lights and lower speed traffic.

- B. High Intensity Prismatic Grade Reflective Sheeting (HIP)

Exclusive prismatic construction sheeting, backed by reliability.

Reflectivity: Exceeds specification ASTM D 4956-04 Type 4.

Best for: Permanent and temporary signages, high quality durability, micro prismatic material with pressure sensitive adhesive.

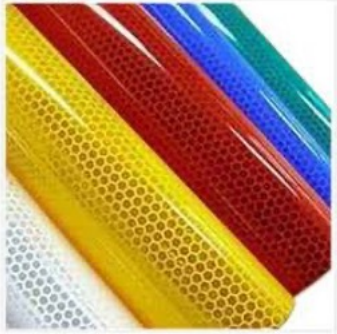

- C. Prismatic Engineering Grade Reflective Sheeting (PEG)

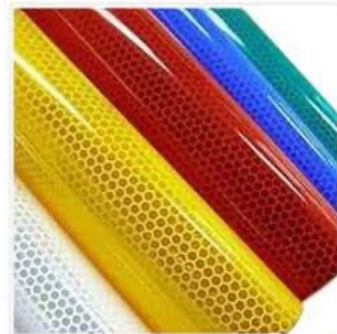

Exclusive prismatic sheeting, backed by reliability

Reflectivity: Exceeds specification ASTM D 4956-04 Type 4
Best for: All traffic situations. Prismatic Engineering Grade is extremely reflective at large angles for the approaching traffic.

D. Premium Prismatic Grade Reflective Sheeting

	<p>Contemporary Micro prismatic sheeting</p> <p><u>Reflectivity:</u> Meets specification ASTM D 4956-04 Type 8</p> <p><u>Best for:</u> These are used for visibility in any lights or weather conditions. Super Prismatic Grade gives good performance at short sight distance</p>
---	--

E. Premium Prismatic Grade Reflective Sheeting

	<p>Contemporary Micro prismatic sheeting</p> <p><u>Reflectivity:</u> Meets specification ASTM D 4956-04 Type 9 and 11</p> <p><u>Best for:</u> These are used for visibility in any lights or weather conditions. Super Prismatic Grade gives good performance at short sight distance</p>
--	---

F. Retro Grade Aluminium Composite Panel Sheet: Aluminium Composite Panel Sheet is mainly used for external and internal architectural cladding or partitions, false ceilings, road signages etc. These are also used as an alternative to expensive and heavier substrates. The products flexibility, low weight, easy forming and processing allow for innovative design with increased rigidity and durability.

	<p>Coil Thickness Available: 0.20, 0.25, 0.40 and 0.50 mm</p>
